

Proceedings of the First Specialty Conference
on Cold-Formed Steel Structures
August 19-20, 1971

Edited by Wei-Wen Yu
University of Missouri - Rolla

SESSION I - INFLUENCE OF COLD WORK AND DUCTILITY

Chairman: D.S. Wolford

Effects of Strain Hardening and Aging on Corner Properties of Cold-Formed Steel Shapes

K.W. Karren and M.M. Gohil

Utilization of Cold Work in Light Gage Steel

N.C. Lind and D.K. Shroff

Elastic-Plastic Buckling of Thin Cold-Formed Circular Rings

S.C. Anand and A.R. Griffith

Ductility Criteria and Performance of Low-Ductility Steels for Cold-Formed Members

A.K. Dhalla and G. Winter

SESSION 11 - BUCKLING BEHAVIOR AND POST-BUCKLING STRENGTH OF PLATE ELEMENTS
AND SECTIONS

Chairman: J.B. Scalzi

Nonlinear Buckling of Thin-Walled Components

T. Y. Yang

A Review of the Effective Width Formula

N.C. Lind, M..K. Ravindra and J. Power

Inelastic Buckling of Thin-Walled Members

S. Rajasekaran and D.W. Murray

Compressive Buckling of Perforated Plate Elements

W. P. Vann

Buckling Behavior and Post- Buckling Strength of Perforated Stiffened Compression Elements

W.W. Yu and C.S. Davis

SESSION III - INFLUENCE OF IMPACT LOADING AND STRUCTURAL BEHAVIOR OF COLD-
FORMED STEEL MEMBERS

Chairman: S.J. Errera

Shock Loading of Thin Compression Elements

C.G. Culver and R.Van Tassel

Loading of Thin-Walled Beams

E.A. Zanoni and C.G. Culver

Response of Thin-Walled Beams to Impact Loading

C.G. Culver, E.A. Zanoni and A.H. Osgood

Impact Loading of Thin-Walled Columns

N.R. Vaid.ya and C.G. Culver

SESSION IV - SHEAR DIAPHRAGMS AND MEMBERS BRACED BY DIAPHRAGMS

Chairman: A.L. Johnson

Strength and Stiffness of Steel Deck Shear Diaphragms

D.S. Ellifritt and L.D. Luttrell

Shear Diaphragms with Lightweight Concrete Fill

L.D. Luttrell

Behavior of Channel and Z-Section Beam Braced by Diaphragms

N. Celebi, T. Pekoz and George Winter

Stabilization of Beams Against Lateral Buckling

K. C. Rockey and D.A. Nethercot

Z- and C- Purlins Connected with Corrugated Steel Sheeting

Paul Wikstroni

SESSION V - FOLDED PLATES AND HYPERBOLIC PARABOLOID SHELLS

Chairman: W.A. Andrews

Cold-Formed Folded Plate Structures

W. C. Schoeller, R. H. J. Pian and H. R. Lundgren

Orthotropic Folded Plate Structures by Extended Finite Strip Method

G.H. Siddiqi and C.V.G.

Vallabhan Design of Cold-Formed Hyperbolic Paraboloid Shells

P. Gergely

World's Largest Light-Gage Steel Primary Structure

Lev Zetlin, C.H. Thornton and R.L. Tomasetti

Critical Shear Loading of Curved Panels of Corrugated Sheets with Restrained Edges

G. Abdel-Sayed

SESSION VI - COMPOSITE DESIGN, SPECIAL APPLICATIONS AND CONNECTIONS

Chairman: G. Winter

Composite Construction - Applications

A.J. Oudheusden

Investigation of Cold-Formed Steel-Deck-Reinforced Concrete Floor Slabs

M.L Porter and C.E. Ekberg, Jr .

Design and Testing - Composite Open Web Steel Joists

J. A. Cran

Beams with Corrugated Webs

D. R. Shernian and J. Fisher

SESSION VII - COMPUTER AIDED DESIGN AND STAINLESS STEEL STRUCTURES

Chairman: J.H. Senne

A Decision Table Formulation of the Specification for the Design
of Cold-Formed Steel Structural Members

P.A. Seaburg

Minimum Cost Design of Composite Floor Systems Using Cold-Formed Steel Decking

J.I. Nicholls and A.T. Merovich

Behavior of Cold-Rolled Stainless Steel Members

S.T. Wang and S.J. Errera

Comparison of AISC Specification for the Design, Fabrication & Erection of Structural Steel for Buildings and AISI Specification for the Design of Cold-Formed Steel Structural Members

W.W. Yu and C.Y. Tung
