

Wei-Wen Yu Outstanding Student Paper Award

The Wei-Wen Yu Outstanding Student Paper Award will be awarded by the Wei-Wen Yu Center for Cold-Formed Steel Structures (CCFSS) at its biennial International Specialty Conference on Cold-Formed Steel Structures.

The award will be given for the best student authored or co-authored paper submitted for the International Specialty Conference sponsored by CCFSS. The student must present the paper during the conference. The paper shall be based on the thesis or research of either an M.S. or Ph.D. student.

The award, a framed certificate and a \$1,000 cash honorarium, will be presented to the student at the Specialty Conference. The certificate will acknowledge the student as the Wei-Wen Yu Outstanding Student Paper Award winner, list the paper title, and the co-authors.

The Call for Papers for the Specialty Conference will contain an announcement requesting paper submissions which qualify for this award. The paper is to be submitted to CCFSS prior to the Specialty Conference deadline for papers, and should include a cover letter requesting that it be considered for the award.

The selection of the paper for the award will be based upon the full paper (not the abstract). The selection will be made by members of the Conference Planning Committee.

This program is financially supported by the Wei-Wen Yu Graduate Fellowship at the Missouri University of Science and Technology.
